

Multi-Space Pay Stations

LUKE II MACHINES

The Luke II machine is a single unit that replaces multiple meters. Each machine is equipped with a 38-key alphanumeric keypad with tactile buttons for easy license plate entry. The Luke II machine provides university customers with the ability to pay for their parking session in multiple language. All campus machines are set for "Pay-by-Plate".

For Gables campus parking, visitors may park their vehicle (head-in only), note their license plate and proceed to the pay station for payment. A receipt will automatically be printed for the customer upon the completion of the payment transaction. There is no need for customers to return to their vehicle to display the receipt as time limits are enforced by checking the license plate using the License Plate Recognition (LPR).

The Luke II multi-space pay station has multiple payment options from credit cards, contact-less payments, smart cards, coupons to Pay-by-Phone services. Our Luke II pay stations do not accept cash payments.

In order sign up for Pay-by-Phone, please visit www.paybyphone.com for instructions.
